Digital Accessibility Statement for OneDrive (iOS app)

This accessibility statement applies to OneDrive (iOS app)

OneDrive Is provided by Microsoft on behalf of the University of Huddersfield. We want as many people as possible to be able to use this mobile application. For example, you should be able to:

- change colours, contrast levels and fonts
- zoom in up to 300% without the text spilling off the screen
- navigate most of the website using just a keyboard
- navigate most of the website using speech recognition software
- listen to most of the website using a screen reader (including the most recent versions of JAWS, NVDA and VoiceOver)

We've also made the mobile application text as simple as possible to understand.

AbilityNet has advice on making your device easier to use if you have a disability.

How accessible this mobile application is

Microsoft's Accessibility Declaration of Conformance Report for OneDrive has identified the platform as partially supporting WCAG 2.1 AA accessibility standard where applicable.

Known Limitations

Contrast ratio for some of the text/controls may not meet 4.5:1 requirement. For e.g. Done button in sign up page.

Some of the area of the app may not adapt the large text settings. For e.g. Tab items and header sections.

Horizontal scrolling is observed, and the text contents are not visible after changing the browser zoom level at 400%.

Text elements may get truncated or overlapped after applying text spacing on the page.

Visual label for some of the UI elements is not the same defined semantically which differs than visual available label.

Some of the messages which appear may not be read by VoiceOver such as VoiceOver doesn't read 'Preparing for Offline use' message that appears on selecting the 'Make offline' button.
